

Task 20

Jan Le

Philippe Rasay Guerrero

API: <https://www.foaas.com>

This application gets motivational quotes from an API and prints it out in the console. The user can choose from different messages/categories, and choose name(s) for the messages.

The image shows a Node.js application running in a terminal window titled "Run - Task20". The application displays a list of 29 motivational categories, numbered 55 to 83. The user has selected "Programmer" (category 57) and "Craig" as the name. The application then outputs a motivational quote: "Fuck you, I'm a programmer, bitch!" attributed to "Craig". The source of the quote is listed as <https://www.foaas.com/programmer/Craig/>.

Overlaid on the terminal is a Trello board titled "Task 20 - Experis Academy". The board has three columns: "To do", "On Going", and "Done". The "Done" column contains a list of tasks: "Find API", "Connect API", "Read API", "Work with data from API", "Visualize data", and "Make an interactive console solution".

Find API: Philippe

- Find an API to use for our solution

Connect API: Jan

- Connects API to the solution

Read API: Philippe

- Reads data from the API

Work with data from API: Jan

- Show available operations from the API for the user to choose from. And see correct and create url for the operations and names needed to get the message

Visualize data: Philippe

- Show the result in console

Make an interactive console solution: Jan

- Make an option for a user to input data, and choose categories
